FRUITS AND VEGETABLES WASHING MACHINES

The tank is made of high quality stainless steel.

Advanced ultra sound and bubble shock wave principle rinses, cleans, disinfects the surface and kills harmful bacteria and decomposition of pesticide residues from fruits and vegetables.

Ozone gas can be diffused into the water for better disinfection.

ROOT VEGETABLES WASHING MACHINE

The machine is equipped with rotating soft/hard brushes which properly clean, removes hair and peels the vegetables under water spray. Different Models are also available as per production capacity required.

- Made of high quality stainless steel
- Durable nylon brushes
- Emery rollers provided for uniform peeling.
- Time saving and Better finish performance than man made
- Economical

FRUITS/VEGETABLES PROCESSING MACHINES

FRUITS/VEGETABLES INSPECTION CONVEYOR

Belt type and Roller type
PVC belt
Customized length and working width
Multiple use for inspection and processing
